

CAPITAL *Surgical Clinic*

Advanced, conservative care close to home

June 2010

As part of an ongoing effort to provide advanced, comprehensive care for cancer patients, a new affiliation with Markey Cancer Center has been established. This affiliation involves Capital Surgical Clinic, Commonwealth Cancer Center (Dr. Arekapudi), Bluegrass Radiation Oncology (Dr. Williams), Frankfort Regional Medical Center and UK Markey Cancer Center. This affiliation will make experimental protocols more easily available and enhance the surgical and oncological care of patients close to home. A monthly Tumor Board meeting has been established. At this meeting, a multidisciplinary group of physicians including surgeons, oncologists, radiologists, pathologists, and community physicians as well as liaisons from the UK Markey Cancer center will be participating. We are excited about this new partnership to better serve our patients with the latest treatments for all types of cancer.
